Fayette County Partners for Recovery

“By Promoting the Principles of Recovery and Making Relationships in the Community, the Fayette County Partners for Recovery is Educating and Providing Public Awareness of Mental Health.”

WHEN and WHERE does Partners for Recovery Meet

Partners for Recovery meets the last Monday of every month (except the months of May and December, which are the weeks before) from 10:30 a.m. to 12:00 p.m. At the Oak House Drop-In Center in the Fayette County Health Center in Uniontown.

WHAT is Partners for Recovery?

Partners for Recovery is our county's Community Support Program, or CSP. Each County in the United States is required to have such functions as a Segway between the regional level CSP and the State-level Office of Mental Health and Substance Abuse Services (OMHSAS). A CSP meeting consists of committees and a steering committee, which consists of co-chairs. The types of committees that a local CSP can have may vary depending on the local or regional need at any given time.

WHO should come to Partners for Recovery?

Membership in Partners for Recovery is open to anyone with an interest of Mental Health Issues in our local community. Many of our members are part of at least one mental health program or service funded either by Medicaid or the Base Service Unit.

Stakeholders in the community are also encouraged to take part in this meeting as well as the are the backbone to the mental health system and see what is "working" and "not working" in the Mental Health Community.

We welcome visitors who would like input on topics or needs of individuals in recovery. If you would like to be placed on the agenda for the meeting's full membership discussion, contact the Fayette County Advocacy Network / Mental Health Association at (724) 438-6738 and ask for the Partners for Recovery Facilitator.

HOPE
HOLD ON, PAIN ENDS.

WHY should you participate in Partners For Recovery?

- YOU can be the voice in how funding for future Mental Health Services is spent and how many persons it can serve.
- YOU can give your experiences as a way of setting the future of Mental Health services and how they can be improved.
- YOU can be part of a group that can make a difference in the community regarding the stigma of those in recovery.
- YOU can have your voice heard that makes changes to the services in the community.
- YOU can have fellowship with others that have shared their experiences in their recovery as you travel that road together.
